Item Number:

Action - Item #1

Item Name:

Proposed Disc Golf Course in Rampart Park

SUMMARY:

This is an action item for Parks Board consideration of the development of a disc golf course at Rampart Park Community Park.

PREVIOUS COUNCIL ACTION:

The Parks Board decision was appeal by two neighbors and heard by City Council. At the November 25, 2014 City Council meeting, the Council considered the two appeal and voted to direct Parks staff take the proposed Disc Golf at Rampart Park plans back to the Parks Advisory Board with the stipulation of relocating holes 11 and 15 to minimize drainage concerns for the residential homes to the west.

BACKGROUND:

The Parks Department has been working with the Pikes Peak Flying Disc Golf Club over the past three years to identify potential properties for new disc golf course locations within Colorado Springs. An analysis was done in 2013 that identified 30 properties for potential locations. Out of those properties, there were about a half dozen that were deemed suitable for Disc Golf. One parcel in the south end of Colorado Springs and two parcels in the northern sections of Colorado Springs were identified for further consideration and public input, including Rampart Park. The near term goal is to install up to three new 18-hole courses in the next 6-8 months to provide more disc golf opportunities in Colorado Springs and to alleviate pressure from Cottonwood Park Disc Golf Course. In October 2013 the Parks and Recreation Advisory Board recommended the following potential sites for further consideration, including a public process to evaluate community interest and support: Briargate site located near Woodmen and Powers, El Pomar/Greenway Corridor site, and Rampart Park.

Rampart Park is a unique and beautiful 78.4 ac community park in Briargate. Community parks are between 25 to 100 acres in size, serving the needs of several neighborhoods as well as community-wide needs (service radius of 2 miles), provide active recreational facilities, and additional park amenities. The park is adjacent to Rampart High School and surrounded by multifamily lots to the north and south of the park, and single family lots to the west of the park. Rampart Park offers an off leash dog park, a baseball diamond, a soccer field, a BMX track, playground, tennis court, basketball court, picnic tables, open space and a great loop walk circumventing the interior of the park. There is also a connection to the Skyline Trail west of the park. Staff has conducted a public process and site evaluation for the Rampart Park location.

The first public meeting generated concerns related to inadequate parking at the park, existing and potential drainage issues at the park, concerns over the lack of maintenance in the park and concerns over the user conflicts that could occur from the disc golf course in the park. The comments collected from the first meeting were generally in support for the disc golf in Rampart Park, so long as the major issues were addressed.

In an effort to address the comments and reduce the concerns from the public, Park staff and the Disc Golf Club revisited the park and amended the course layout to address the major issues. The revised disc golf course layout took into account additional provisions to limit erosion from use and reduce the possibility of user conflicts between disc golfers and other park users. Park maintenance was contacted to address the problem areas highlight from the meeting and a work order was submitted to fix the issues. Additional site improvements outside the disc golf course were included to add additional parking and a pedestrian walk along the driveway.

The revised plan was presented at the second neighborhood meeting to highlight the major issues and how they were addressed. Attendees at the meeting presented additional concerns about further drainage concerns, impacts to the wildlife and the degradation of the natural resources. Development of the disc golf course will require no grading or excavation of the site; however, there were significant concerns with the delicate vegetation being trampled and destroyed. The majority of the attendees expressed strong opposition to the proposed disc golf course, citing the area of the proposed disc golf course was open space and should not be disturbed.

Based upon review of the existing resources, as well as research of other disc golf courses, staff concurred that development of a disc golf course would have some impact on the existing natural resources and recommended that the disc golf not be developed and that the Rampart Park Master Plan not be amended.

After review of the collected comments, consideration of the protection of the natural resources values and discussion with staff, the Park and Recreation Advisory Board voted in approval (8-0) of Disc Golf in Rampart Park.

The Board's decision was appealed by two neighbors. One appellant was concerned over two of the 18 holes, which would drain into his lot and could result in increased runoff and private property damage. The second appeal, from a resident of the townhomes to the south included a long list of concerns including safety issues, natural resource damage, erosion and noise pollution. Per city ordinance, the appeals were presented to City Council on November 25, 2014. After the staff presentation, the presentation by the appellants and public comments for and against the appeals, the City Council voted to refer the item back to the Parks and Recreation Advisory Board with a specific stipulation of moving holes 11 and 15 out of the drainage.

Parks staff met with the Pikes Peak Flying Disc golf Club to modify the course by relocating the two holes of concern. Parks Staff also reached out to the two appellants to gain additional comments and concerns. One appellant responded the revision addresses their concerns. The second appellant provided additional concerns over public safety, maintenance, and parking issues. Specific concerns raised by the appellant include:

- 1. Increased density of users within the park. The park is already over used. Staff response: The location of the disc golf course will disperse users across the park. Additional parking has been proposed to alleviate parking congestion.
- 2. Detention basin grate at the end of the Mirage Channel is clogged with sticks and sediment. Requesting assurance of routine maintenance.

 Staff response: Maintenance of the stormwater detention basin is the responsibility of Public Works. Park staff has notified Public Works of this concern and requested routine maintenance of the grate.
 - 3. Drainage and erosion concerns in proximity of the detention basin.

Staff response: Alignment of the trails and golf holes have been carefully aligned to follow the contours to minimize erosion and drainage concerns. Small trail improvements may be necessary to provide access across existing erosion channels or gullies.

4. Existing restroom is closed during the winter. Year around bathroom facilities are necessary.

Staff response: A port-a-let will be provided adjacent to the existing restroom facility during winter months.

5. Parking in the neighborhood and along the Mirage Drive.
Staff response: No parking is currently allowed on Mirage Drive. No parking is currently allowed within the neighborhood. Additional parking is proposed within the park to accommodate additional park users.

6. Trail access from the neighborhood to the existing concrete trail is cut off by the proposed disc golf course.

Staff response: An alternative, sustainable, trail will be constructed to provide access from the northwest corner of the detention pond to the existing concrete trail to eliminate conflicts with the disc golf course.

- 7. A sidewalk or trail along the park entrance road is needed for safety of pedestrians. Staff response: A sidewalk has been proposed along the park entrance road.
- 8. High school kids crossing through the disc golf course will be a safety issue. Staff response: Based upon feedback from Appellant, there appears to be one primary area of concern at Hole #3. This area has good, open, visibility for both disc golf players and pedestrians. Signs will be placed at points where social trails cross the disc golf course that state: "Entering Disc Golf Course Watch for Flying Discs."

FINANCIAL IMPLICATIONS:

The Pikes Peak Flying Disc Golf Club has committed to funding the materials and installation of the disc golf course at Rampart Park. They are also committed to the longer term course maintenance.

The additional Master Plan improvements would be implemented and phased as funds become available for the Parks Department. The gravel parking lot and the addition of the a sidewalk connection from Lexington into the park will be included as a summer 2015 project and be completed prior to the installation of the proposed disc golf course. Paving of the new parking stalls along the existing drive way and parking lot as well as the paving of the "gravel" parking lot will happen at a future phase, as funds become available.

BOARD/COMMISSION RECOMMENDATION:

At their October 9th, 2014 meeting the Parks Advisory Board voted 8-0 to approve the amendment of the Rampart Park Master plan and that disc golf be developed in the natural area of Rampart Park.

ALTERNATIVE:

Deny the revised amended Rampart Park Master plan with the proposed development of a disc golf course in the natural areas of Rampart Community Park as well as the additional parking and pedestrian access improvements.

RECOMMENDATION:

Approve the revised amended Rampart Park Master plan with the proposed development of a disc golf course in the natural areas of Rampart Community Park as well as the additional parking and pedestrian access improvements.

PROPOSED MOTION:

Motion to approve the revised and amended Rampart Park Master plan to include 18-hole disc golf in the natural areas of Rampart Park, and the site improvements as presented.

Chris,

I just checked the link to the Rampart Disc Golf website and noticed these appeals that were heard by City Council back in November. I was not aware of the appeals, otherwise, I would have attended to support the appeal. Unfortunately, I was out of town when it was presented to the Parks Board back in October. No new information has been posted. What is the status? Is this still open for comment or input? The more I think about It, the more reasons I come up with that this would be bad for the park.

Rampart Disc Golf Course

Project Update - November 14, 2014

The Parks Advisory Board October 9th decision to permit Disc Golf in Rampart Park has been formally appealed by two separate applications. The appeal of the Parks Board decision will be presented and heard at the City Council Meeting on Tuesday November 25th, 2014. The meeting will begin at 1pm. The City Council Agenda will be available within the next on the web at:

https://coloradosprings.legistar.com/Calendar.aspx

Additional information will be posted when it becomes available.

Subject: RE: Disc Golf in Rampart Park

Hi, Brian:

Thanks for your comments related to the proposed disc golf course in Rampart Park. As you may be aware, staff is not recommending that the disc golf course move forward – based upon community input and our evaluation of the site.

We will be sure to share your comments with the Board.

Thanks,

Disc Golf Course at Rampart

Date:

Tuesday, February 03, 2015 1:48:16 PM

Dear David,

Thank you for the opportunity to comment on the proposed Disc Golf Course at Rampart. My husband and I, regular users of Rampart Park, just reviewed the plan that will be discussed at the upcoming meeting on February 12. While, regretfully, we will be unable to attend the meeting, we would like to express our opposition to incorporating a Disc Course at Rampart. We have lived here for 10 years and have loved walking the sidewalks around the perimeter of the Park. We live in one of the adjoining neighborhoods, and the 45-minute circuit from our house and back has been a frequent source of joy and refreshment as we take in the beautiful views, enjoy the sights of migrating birds and wildlife, and sense some peace and tranquility in Colorado's beautiful sunshine at the beginning or end of stressful days.

We drive to Cottonwood Creek Park occasionally, for a change of scenery. Walking past the disc golf area there is not relaxing. The signage clearly warns of flying discs. So, for that segment of the walk, we are constantly looking towards the course- backwards, forward, sideways - always on edge; relieved when we are past it. As we studied the proposed course at Rampart, we could see that our walks there will be basically ruined. About 50% of our walk would be in "high-alert" mode, as the proposed disc golf course goes alongside that much of the sidewalk. Even worse, at one point, disc golf would be talking place on both sides of the sidewalk, not just on one side as it is at Cottonwood Creek Park.

Not wishing to deny the interested parties a new place to enjoy their favorite form of recreation, though, what about planning the new park at Briargate Boulevard and Union Bivd around a Disc Golf Course? I'm not sure if that park has a master plan yet, but it seems like it would be much easier to incorporate Disc Golf into a park that hasn't yet been built, than into one which is established and already enjoyed by many different users ... dog owners, walkers, runners, BMXers, baseball players, soccer practice, etc.; and which lies in the middle of many established neighborhoods.

Basically, bottom line, we will be very disappointed if the lovely and tranquil park at Rampart is overtaken by Disc Golfers, and we would like to register a "no" vote on this proposal.

Thank you, Nancy & Dave Jensen 2765 Boleyn Drive, 80920

SUBJECT: 2014-City-Wide Trailhead Burglary of Motor Vehicle (BMV) Report

As requested, city-wide trailhead/park BMVs were examined. Calls for Service (CFS) resulting in Case Report Numbers (CRN) at nine park/trailhead locations throughout the city were examined between the dates of 01/01/2008 and 12/31/2014. The parks/trailheads that were examined include Bear Creek Park, Blodgett Open Space, Cheyenne Canyon, Garden of the Gods, Stratton Open Space, Palmer Park, Red Rocks, Ute Valley Park, and Santa Fe Trail at Woodman Rd.

Between 01/01/2008 and 12/31/2014 there were a total of 1373 BMVs that occurred at the above listed locations with an average of 196 incidents occurring each year. Clear seasonal fluctuations can be observed with the most BMVs typically occurring during the warmer months. In 2014, this was not the case as the first and fourth quarters had increased activity.

During 2014, activity continued to be higher than average but decreased from 268 incidents in 2013 to 215 incidents; this represents a 19.78% decrease when compared to 2013, but is still 9.69% above the seven year average. Please see the graph below displaying all city-wide trailhead BMVs by quarter.

When activity at each trailhead/park is examined over the last seven years, an upward trend can be observed at all locations with the exception of Ute Valley Park and Blodgett Open Space (see table below). The trailheads/parks which experience the most activity in order are, Garden of the Gods, Cheyenne Canyon, Red Rocks, Palmer Park, and Bear Creek. In 2014, BMV activity at Cheyenne Canyon tied for its highest levels during the last seven years. Garden of the Gods activity was still elevated but has continued to decrease since the high in 2012 (see BMVs at Select Trailheads by Year below).

COLORADO SPRINGS PARKS AND RECREATION DEPARTMENT

PARKS AND RECREATION ADVISORY BOARD

Date:

February 12, 2015

Item Number:

Presentation - Item #3

Item Name:

Presentation of the Ute Valley Park Master and Management Plan

SUMMARY:

Through an extensive public process, Staff and the consultant team (Tapis Associates) have prepared the Draft Ute Valley Park Master and Management Plan for review and input by the public, the TOPS Working Committee, and the Parks and Recreation Advisory Board.

PREVIOUS COUNCIL ACTION:

N/A

BACKGROUND:

In 1969, Ute Valley Park was donated to the City. Over the decades, additional parcels have been dedicated and acquired through the City's Parkland Dedication Ordinance (PLDO), expanding it to 338 acres. A master plan for the original portion of Ute Valley Park was completed in 1991.

In 2013, 200 acres of the Hewlett-Packard property was purchased with a combination of private funding, a Great Outdoors Colorado (GOCO) Lottery grant and Colorado Springs's Trails, Open Space and Parks (TOPS) sales tax funding. These properties contain significant natural, historical and cultural resources that merit protection and preservation. Heavily used by neighbors and the community, visitors enjoy a variety of activities including hiking, dog-walking, mountain biking, sight-seeing and quiet reflection.

The master plan process kicked-off during the spring of 2014 with the City working with a variety of Technical Experts to conduct baseline surveys of the property. In May of 2015, TAPIS Associates was selected as the consultant to complete the master and management Plan. During the summer months the Friends of Ute Valley Park assisted the City in collecting intercept and parking surveys. Data was collected to inform the plan through a variety of methods including numerous site visits, stakeholder interviews, onsite surveys, and review of existing resource studies.

To help guide the planning process "Givens", non-negotiable issues that the Department would be irresponsible not to fulfill, were established by the Parks Department to provide a framework for responsible decision making. From within this framework, master plan participants and the project team identified the key issues to be addressed throughout the process, established project values, and set common themes to guide in decision making.

The planning process included over 20 "Meetings-in-a-Box", where the community met in small groups. The group leaders were provided a box of information to facilitate the meeting and asked specific questions of the participants. The information collected through the Meetings-in-a-Box were collected and used as the "Issues" list to begin the public process. Three (3) public meetings were held to discuss the issues, challenges, opportunities, and possibilities within the Ute Valley Park. With a hands-on activity during each meeting, the public had an opportunity to hear the information that was presented and provide feedback on how that information was

MINUTES

Parks and Recreation Advisory Board January 8, 2015 1401 Recreation Way, CSC 80905

Board Members Present: Jackie Hilaire, Gary Feffer, Charles Castle, Scot Hume, Ron Ilgen, Alex Johnson, Mina Liebert, John Maynard, Hank Scarangella

Alternates Present: Jason Rupinski, Bob Lally

CALL TO ORDER

Opening: Chair Hilaire called the meeting to order at 7:30 a.m.

CITIZEN DISCUSSION

Acquisition of 2.27-acres of Property: John Demmon said that he supported Action Item #2, which is the acquisition of 2.27-acres of property from Richard Bratton and Mary Oldendorf as an addition to Garden of the Gods Park.

Rampart Park Disc Golf: Carol Olsen asked when the Rampart Park Disc Golf item will be on the agenda.

Chris Lieber, Parks Development Manager, said that the Rampart Park Disc Golf item will be on the February agenda.

APPROVAL OF MINUTES

Scot Hume made a motion to approve the minutes from the December 18, 2014 Board meeting. Motion seconded by Charles Castle and carried unanimously.

Ayes: Jackie Hilaire, Gary Feffer, Charles Castle, Scot Hume, Ron Ilgen, Alex Johnson, Mina

Liebert, John Maynard, Hank Scarangella

Nays: None Absent: None

ACTION ITEMS

Legacy Loop Resolution of Support, Great Outdoors Colorado Grant Request
 Chris Lieber, Parks Development Manager, provided a PowerPoint presentation regarding a resolution of support for a grant request for the Legacy Loop from the Great Outdoors Colorado. (See presentation)

The Legacy Loop project is a grant-supported trail and park development project focused on expanding access to outdoor recreation, increasing trail connectivity, and improving park amenities. This project will improve the safety and multi-use functionality of the Pikes Peak Greenway, create a regionally significant east-west trail connection along the Rock Island trail corridor, and expand park offerings within historic Monument Valley Park. The Legacy Loop project will support downtown revitalization efforts by enhancing one of the most popular recreational amenities in the Pikes Peak Region.

The Parks, Recreation and Cultural Services Department submitted a Great Outdoors Colorado (GOCO) 'Paths to Parks' Grant request in early 2014. GOCO received numerous applications from across Colorado and the Legacy Loop was not awarded a grant for the 2014 cycle. Subsequently, the City has

Parks and Recreation Advisory Board Meeting Minutes.....January 8, 2015 Page 2

submitted a new concept paper for the Legacy Loop project and GOCO has invited the City to apply for a second round of grants. This Resolution of Support is for a \$1,000,000 dollar grant application to Great Outdoors Colorado. These grant dollars represent one of GOCO's largest recreation grants to date and are essential to completing the Legacy Loop project. Additional project funds are expected to come from the Greenway Foundation, the Trails, Open Space and Parks (TOPS) tax, the Conservation Trust Fund (CTF), and private donations.

Scot Hume made a motion to approve the resolution supporting a grant application for the Legacy Loop Trail Project with an amendment to include multiple access points. Motion seconded by Charles Castle and carried unanimously.

Ayes: Jackie Hilaire, Gary Feffer, Charles Castle, Scot Hume, Ron Ilgen, Alex Johnson, Mina

Liebert, John Maynard, Hank Scarangella

Nays: None Absent: None

2. <u>Acquisition of 2.27-acres of Property from Richard Bratton and Mary Oldendorf as an addition to Garden of the Gods Park</u>

Chris Lieber, Parks Development Manager, said that Richard Bratton and Mary Oldendorf have approached the Parks Department with an offer to sell their private property located adjacent to Garden of the Gods Park. The 2.27-acre parcel is located on Rampart Road at the western edge of Garden of the Gods Park. Acquisition of the property is consistent with the Garden of the Gods Master Plan. The property is offered to the City for a purchase price of \$7,000. (See presentation) An amount of \$8,500 is being requested to cover all closing costs.

Mina Liebert made a motion to approve to acquire the Bratton Property and the expenditure of \$8,500 from the TOPS Open Space Fund. Motion seconded by Charles Castle and carried unanimously.

Ayes: Jackie Hilaire, Gary Feffer, Charles Castle, Scot Hume, Ron Ilgen, Alex Johnson, Mina

Liebert, John Maynard, Hank Scarangella

BOARD BUSINESS

> Board/Committee Reports and Concerns

<u>City Auditorium Task Force</u> (<u>Alex Johnson</u>): There will be one more internal meeting prior to moving forward with reaching out to the community to form a Task Force.

Parks and Recreation Advisory Board Meeting Minutes.....January 8, 2015 Page 3

<u>Parks Department Calendar (Charles Castle)</u>: Requested to receive more calendars and the cost to print the calendars.

Art Commission (Jackie Hilaire): Art is currently being exhibited at the Airport. There is an opening on the Art Commission. The Committee will meet within the next two weeks.

<u>Ute Valley Master Plan</u> (Hank Scarangella): The master plan is progressing. On January 7th, there was a discussion regarding regular trails through the parks. The master plan is very challenging due to the diverse group of users (i.e. mountain bikers, pedestrians, walkers with dogs, etc.). The

next public meeting is scheduled on January 27th, 7:30 p.m. at Eagleview Middle School.

<u>Labor Day Special Event</u> (Ron ligen): Five Request for Proposals have been received. The City is currently in the process of selecting a vendor as well as negotiating funds with the City to have the event this year.

ADJOURNMENT

There being no further business, the Board adjourned at 8:45 a.m.

PARKS AND RECREATION ADVISORY BOARD MEETING - January 8, 2015

STAFF REPORT

> Safety in Parks

The Park Advisory Board has requested a briefing on the safe use of our parks with a specific interest in the Pikes Peak Greenway Trail and downtown parks and particularly how the activities of the homeless population is managed. Park staff has requested a recap of illegal activities that occurred in our parks in 2014. Police Department analysts are now compiling that information and will have that information available for the February meeting. It is planned to also have in attendance Lt. Jeff Jensen of the Gold Hill Division and an officer of the Homeless Outreach Team (HOT Team) to brief the board on their activities and protocol on managing the homeless populations.

Bear Creek Canon Caretaker's House: In response to Board member Maynard's question regarding the Caretaker's House at Bear Creek Canon about partnering with local non-profits to make it habitable and place someone in the house, Kurt Schroeder, Manager of Park Operations and Development, said that he will look into it and provide a report at the February meeting.

Rock Island Trail Acquisition Update

A key missing gap in the City's trail system is located along the Rock Island Trail corridor, between the Pikes Peak Greenway and Templeton Gap Road. This trail corridor was first identified as a priority for completion in the City's 1983 Trails Master Plan. The trail corridor is currently identified in numerous community plans including the 2015 Park System Master Plan, the Legacy Loop, the Downtown Action Plan, and the City's Bike Plan. To advance this project, Staff has been pursuing negotiations with the Union Pacific Railroad to acquire property from the former Chicago-Rock Island Rail Line for the development of the Rock Island Trail. Based upon favorable negotiations, and pending satisfactory due diligence findings, staff anticipates acquisition of the corridor in mid-2015. This acquisition timeline will enable construction of this missing trail segment of the Rock Island Trail, from the Pikes Peak Greenway to Templeton Gap Road, in early 2016.

> Status on Closure of Portion of High Drive

High Drive Flood Damage Updated

The September 2013 floods caused significant damage to several locations in the Parks system, including High Drive. Flood damage along the 3.5 mile gravel mountain road caused High Drive to be closed to all recreational use for several months. The closure was based on the flood damage on the roadway and the flood damage to the USFS trail system. The Department partnered with the Forest Service and Colorado Springs Utilities to restrict access to High Drive and the affected trails leading through USFS lands to the CSU managed Jones Park the area over concerns for public safety; the trail damage was severe in many areas. In the spring of 2014 the USFS trail damage was assessed and major problem spots repaired. Immediately following, the Parks Department worked to open two segments of High Drive for non-motorized recreational use – From North Cheyenne Cañon Park (the parking lot above Helen Hunt Falls) to the summit of High Drive and the segment from Bear Creek Road at the High Drive caretaker's house uphill to the Trail 666. The segment from Trail 666 to the summit of High Drive remained closed because of the flood damage.

High Drive was identified as a FEMA Public Assistance eligible site. The FEMA funds will restore High Drive to pre-storm conditions and there will be some additional mitigation money for a project next summer to improve the drainage system and create a regional sediment trap to protect Bear Creek from sediment coming from the roadway. Total funding is over \$800,000 between the repair work and mitigation work.

Sun Construction was hired to perform the flood damage repair work this fall and winter. The timing of the work was driven by a desire to avoid the monsoon season, recreational peak use and the spawning of the Greenback Cutthroat Trout. The repair work is approximately 45% complete as of December 31, 2014. The two significant washouts have been repaired, along with rough grading

along 2.5 miles of High Drive. Currently the contractor is on a weather delay due to our recent frigid temperatures and snowfall. The mitigation construction is scheduled for the summer of 2015.

Non-Motorized Recreational Access

At this point recreational use will be limited to non-motorized use (hiking, cycling, and equestrian use) once the FEMA repair projects are completed. The Parks Department is working with the Forest Service lead NEPA process in the Bear Creek Watershed and will restrict motorized access while the NEPA process is ongoing while the area is in study.

High Drive follows Greenback Cutthroat Trout Habitat within Bear Creek for ¾ of a mile before climbing the hillside, leading away from the creek. Once the NEPA decision is approved, the mitigation efforts to reduce impacts to the creek and improvements to the trout habitat can commence. The Parks Department will continue to conduct their best effort to be good stewards of the endangered Greenback Cutthroat Trout and be good partners with the Forest Service through the project.

High Drive was originally closed to motorized use a few years ago because of the discovery of the Greenback Cutthroat Trout. The Forest Service and Colorado Springs Utilities were sued by the Center for Biologic Diversity regarding the motorized trail use in the Bear Creek Watershed. To address the issues and initiate a plan to move recreational trails out of the Bear Creek Watershed, the Forest Service began an Environmental Assessment and NEPA process. The plans are close to completion and the preferred alternative of the plan should be released for public comment in the first quarter of 2015. There is a possibility that the preferred alternative may not allow motorized use in the Bear Creek Watershed, thus keeping High Drive only open for non-motorized recreational use and emergency/administrative vehicular use only.

> Buffalo Solders Memorial Update

(See attachment)

> Gimme Golf Concessionaire

Both Patty Jewett and Valley Hi Golf Courses will have the same concessionaire; Gimme Golf.

> SCIP (Springs Community Improvement Projects) Bond Projects

Karen Palus, Director of Parks, Recreation and Cultural Services, provided a brief update regarding the Mayor's Community Forums, City's backlogged capital improvement projects, which includes the Parks Department's projects (\$10 million), and a potential reissuance of the SCIP bond through the April 2015 election.

There was a consensus by the Board to send a support letter for reissuing the SCIP bond to City Council.

UPDATE FOR PARK and REC BOARD - January 8, 2015, 7:30 (PUBLIC COMMENTS, 3 minutes)

Since our last meeting, May 8, 2014, I am providing the follow update as a public record:

- Committee of 11 citizens (US Army, US Air Force, US Marines, and spouse) meet monthly, two Buffalo Soldiers experts providing historical guidance
- Local artist (Rod Mench, former US Army) providing technical and fundraising support
- Project completion date now July 25, 2016, 150th anniversary of the Buffalo Soldier congressional authorization and Buffalo Soldiers Day
- Establish fundraiser websites in collaboration with the Pikes Peak Community Foundation
- Fundraiser Dinner will be Saturday, March 14, 6-9 pm, Antler Hilton Hotel, CS, CO
- Western style show and fundraiser scheduled for July 25, 2015, 2-6 pm, Iron Springs Chateau,
 Manitou Springs
- Working with two landscape architects to examine city building requirements

PARKS AND RECREATION ADVISORY BOARD MEETING - February 12, 2015

STAFF REPORT

> Bear Creek Canon Caretaker's House

At the request of Mr. Maynard at the January 8, 2015 Park Advisory Board meeting, staff has begun investigating whether the unoccupied house at the entrance of Bear Creek Canon Park could be used as low income housing by one of the local non-profits. The impetus for Mr. Maynard's suggestion was twofold; first, to provide a lower income housing option and second, to provide a presence at the mouth of the for safety and security purposes for users of the trailhead parking located there. The initial suggestion was to see if Habitat for Humanity might be interested and if HBA Cares, the philanthropic arm of the Home Builders Association, might be interested in helping with any potential renovation. Staff has reached out to both. The model that would be considered for the house is outside of Habitat for Humanity's mission. Their main goal is to assist people toward home ownership. In our case, the house would remain in the possession of the City. However, HBA Cares was interested as a partner to assist in the renovation of the house as may be needed. Greccio Housing and Partners in Housing were also approached with Partners in Housing expressing an interest and willingness to work with HBA on the project if feasible. It has been discussed that Federal grant dollars may be available to assist with any necessary renovations but they may also come with their own set of challenges. This is being further investigated. Greccio Housing works primarily with multifamily housing and investing in a single family home was outside of their typical approach. Staff is continuing to explore what possibilities may be available with Partners in Housing and HBA Cares. Staff has also approached City legal and real estate staff to see if such an arrangement might be permissible. An additional update will be provided in March.

Labor Day Special Event in Memorial Park with Hot Apple Productions
Through a competitive Request for Proposal process, Scott Appelman (Hot Apple Productions) submitted an event proposal to continue the 38-year tradition of hot air ballooning in the City of Colorado Springs. Appelman is a past president of the Albuquerque Convention & Visitors Bureau and served on the board of the Albuquerque Balloon Fiesta for six years. His hot air balloon ride company, Rainbow Ryders, is the largest balloon company in the U.S., with more than 60 employees and offices in both Albuquerque and Phoenix.

Hot Apple's vision for the Colorado Springs balloon event is to create a well-rounded offering for the viewing public, to include entertainment from bands, cheerleading squads and dance troupes, a car show, sky-divers, vendors/concessionaires and a kid's play area. This festival-like atmosphere would give visitors a reason to stay and enjoy the event, even if inclement weather prevents a balloon flying activity.

Additional event enhancements include unique Special Shape balloons, pilot hospitality and VIP/sponsor activities, all of which will enhance the experience for all attendees and event partners.

> 2014 Accomplishments

Staff will provide an update at the meeting.

> Request for Proposal (RFP) Update

Staff will provide an update at the meeting.

> Joint City/County Parks Board Meeting

The meeting is scheduled on March 12, 2015, 11:30 a.m. at the Patty Jewett Golf Course Club House: 900 E. Espanola, Colorado Springs, CO 80907
